Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Claims 7-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 4. The structure presented on the preamble of claim 18 is not considered as limiting the application of the methods disclosed. The structure must be presented in the body of the claim along with the limitations. As this is not the case in the instant application the restriction requirement is made final.

Specification

The abstract of the disclosure is objected to because the abstract is longer than 150 words. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art in view of Faiman et al. The admitted prior art teaches a media library comprising:

an enclosure for housing a bi-directional array of media cartridges;
a plurality of picker robots responsive to a control device for retrieving and placing the media cartridges from or to the storage locations;

a plurality of access means to said enclosure.

The admitted prior art does not teach a safety interlock for the door to the enclosure.

Faiman et al. US 2002/0009512 teaches a device with a safety interlock comprising:

- a door (32) covering the moving part of a press machine (19);

- a sensor on said door for detecting if the door is open or closed;

- a control device that operates the device in the following modes:

 - a first mode where the door is closed and the device moves at a first specified speed;

 - a second mode where the door is open and the device moves at a second specified speed that is slower than said first specified speed;

 - wherein the speed reduction is set via a command to a controller or through changes in power to a variable frequency drive motor;

 - wherein the door sensor operates only in said second mode if said door is open.

It would have been obvious to one of ordinary skill in the art, at the time of invention to provide the admitted prior art with a safety interlock as taught by Faiman et al. in order to keep the operator from being hurt by the device while working in the enclosure.

Response to Amendment

The amendments to the specification and drawing are approved and have been entered into the record.

Art Unit: 3652

The prior art made of record and not relied upon, but considered pertinent to applicant's disclosure is: Gundy 1977, Gobel 1990, Tino 1994, Baca et al. 1999 and Apple 2000.
